### New York Stock Market

New York, August 1.—Contrary to expectations in some quarters, the intention of the government to deposit funds to expedite the movement of crops to market failed to exercise more than a momentary stimulating effect on security values to-day. In financial quarters the statement deniling with this matter was received with some resontment, here being a disposition to question the legal right of Washington to accept commercial raper as collatoral for Federal deposits. Other developments, including the first real reposare of the season and the governments unfavorable estimate for cotton, were more disturbing and far reaching. Advices, more or less authoritative, indicated further severe damage to corn by reason of the extended drought in the Southwest and compitions rose excitedly at leading markets. Shares of roads in the South and Southwest sere correspondingly depressed.

The inevenient spread until it embraced stretchails all railroad groups, almost the bale exception being Baltimore and Ohio, illinois Central fell lower than on the day its dividend reduction, while New York Entital and some of its allied lines, Atchison in Pennsylvania, all of which submitted diverse July reports were under more or east presence a sharp break in Mexican responding mancial embarrassments of the Mexican republic with hints of an arrival and and are proposed as the formal pennsylvania and of which submitted diverse July reports were under more or east presence a sharp break in Mexican facility as accommendations. The general supply as flighter with a decrease of interior offerners. The cash movement indicated a gain or the week of about \$1,00,00. the with a decrease of interior offer-rice cash inversion interior offer-week of about \$4,00,000. general bond market was inclined to with sharp declines in speculative is-locerument 2s and Panama 3s ad-

Established 1892.

CHARLES THE STATE OF THE STATE

In the absence of speculative interest in stocks attention was directed to crop news, and this was not altogether favorable. Corn prices rose sharply, and stocks of the corn-carrying roads shaded fractionally. The government report on the condition of cotton fell below expectations, with indications that most of the damage had occurred in the Southwest. in the Southwest. June railroad reports showed decreases in net earnings. Pennsylvania lost \$1,297,000, New York Central \$481,000, and Atchison \$456,000.

such a time as is most convenient to themselves has not inspired confidence. In the absence of speculative interest

The banks here show a gain of \$4,-500,000 cash for the week, indicating another favorable bank statement. It may be inferred from this movement that any increase in facilities to out-of-town banks will but augment the supply of money in New York.

The tone of the stock market is one of quiet strength. While bankers may not agree with the Treasury's plan to inflate currency, it is generally believed that the surplus of funds provided by the government will stimulate speculation for advancing prices.

#### WEEKLY COTTON REVIEW

New York, August 1.—The cotton market has been comparatively quiet during the past week, and aside from rather violent fluctuations in July contracts, as that delivery finally matured, prices have been without any particular feature. On the last day of trading in July deliveries quite a flurry of covering developed, which sent the price up 46 points, and again emphasized the firm old crop situation, while early week declines in new crop deliveries were recovered yesterday on the publication of the government's August report, showing a crop condition slightly under the ten-year average. The rally in new crop positions was also encouraged by renewed apprehension as to the crop situation in the southwest. The light showers reported during the previous week had not been considered adequate by many authorities, and the reappearance of dry, hot wenther has been followed by increasing complaints of deterioration, particularly from South Texas. Yesterday there seemed to be better indications for lower temperatures and showers, but while accounts as to the immediate progress of the crop are more or less conflicting most of the advices reaching the trade indicate that good rains are urgently needed, and that the situation will become serious should they not occur within the next week or ten days. Local statisticians figured that the condition figures of 79.6 as of July 25, point materially to a total crop of less than 14,000,000 bales on the government's estimated acreage, but while such deductions compared very builishly with the consumption of the past two sessions, bearishly disposed traders base their position on the possibility of improvement in this respect, a siack trade demand, and the approaching new crop movement. Trade interests were credited with buying rather freely here on the declines early in the week, but the support from this source was less in evidence on the advance and part of the selling has come from Southern sources, whether or not it has been against propagetive crops. Liverpool was a heavy selle New York, August 1.-The cotton market

#### **BRADSTREET'S REPORT**

New Orleans, August 1.—Secretary Hester's statement of the world's visible supply of cotton, issued to-day, shows the total visible to be 2.586,203 bales, against 2.750,351 last week and 2.485,472 last year. Of this the total of American cotton is 1.315,203, against 1.426,351 last week and 1.597,472 last year, and of all other kinds, including Egypt, Brazil, India, etc.: 1,271,000, against 1,324,000 last week and 880,000 last year.

against 1,324,000 last week and 880,000 last year.

Of the world's visible supply of cotton, there is now afloat and held in Great Britain and Continental Europe 1,427,000, against 1,553,000 last year; in Egypt, 91,000, against 51,000 last year; India, 791,000, against 539,000, and in the United States, 277,000, against 213,000 last year.
